

Aseana City's visionary development plans unveiled via Meralco partnership

State-of-the-art substation project to boost expansion strategy in key township development

Aseana City, dubbed as the Bay Area's 'Next Generation City', is set for the implementation of the next phase of its progressive plans for the masterplanned community through the construction of critical power facilities that will provide quality, reliable and sustainable electric service to its residents and locators. Via a collaborative real estate agreement with the Manila Electric Company (MERALCO), the Aseana-1 Substation Project is set to break ground in Q1 2021 and targeted for completion by 2H 2022.

Aseana City, a 107-hectare mixed-use development situated between the Mall of Asia Complex and the PAGCOR Entertainment City, is one of the fastest growing master planned township projects in the country developed by D.M. Wenceslao and Associates, Inc (PSE: DMW). Its existing locators include City of Dreams Manila, Ayala Malls Manila Bay, S&R Membership Shopping, Department of Foreign Affairs, Singapore School Manila, Sequioa Hotel, Honda Manila Bay, among others.

Through its partnership with Meralco, D.M. Wenceslao Group fulfills its commitment to provide world class infrastructure for its locators and residents. The forthcoming substation will further enhance energy efficiency and strengthen the power supply capacity in the entire Aseana City estate. "Aseana City is a master-planned community that connects people to home, work, play, and more. And as our community continues to grow, we want to give them the security and assurance of future-proof resources that are mindfully-designed to allow them to live a comfortable life", shared Buds Wenceslao, CEO of DMW Group.
