

Interruptible Load Program (ILP) Protocol

November 18 Webinar

- ILP was promulgated under ERC Resolution No. 8 Series of 2010 and amended by Resolution No. 8 Series of 2013, No. 5 Series of 2015, and No. 3 Series of 2019
- ILP was first implemented in Visayas and Mindanao to ration limited power supply and avert prolonged power outages. In anticipation of a potential power supply shortage in Luzon, DOE initiated ILP implementation in MERALCO in March 2014.

- ILP is a voluntary, demand-side management program that allows customers to **collectively reduce electricity drawn from the grid** when power interruptions are imminent to ration limited power supply.
 - Open to non-contestable customers, contestable customers, locators in economic and freeport zones, and directly-connected customers
 - Prioritizes customers with large loads and requests them to 'de-load' when NGCP issues a Red Alert notice
 - Can be implemented by (i) DUs in their respective franchise, or (ii) NGCP for directly-connected customers, PEZA, ecozone utility enterprise and other DUs

- The ILP Agreement, protocol, as well as the compensation and recovery mechanism, are part of ERC Resolution No. 5 Series of 2015
 - For captive customers, the ILP Agreement is between the customer and the DU
 - For contestable customers, the ILP Agreement is a tripartite agreement among the DU, a Retail Electricity Supplier (RES) or Local RES, and its contestable customer
- The ILP Agreement automatically terminates if: (i) a captive customer switches to the contestable market, and (i) a contestable customer switches from one RES to another

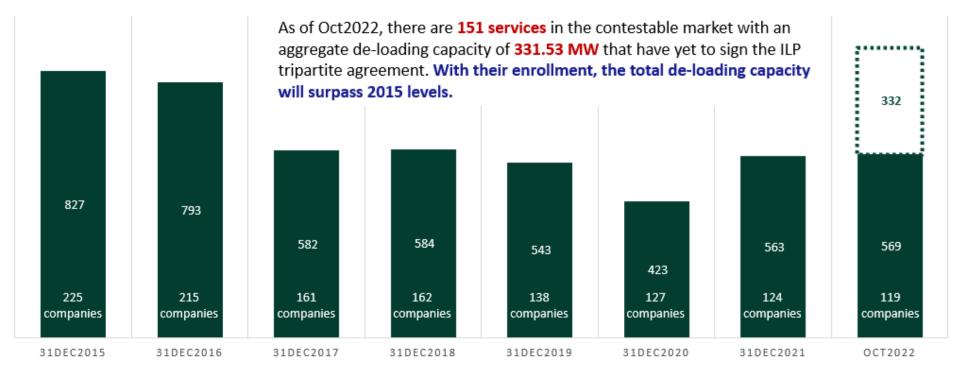

As of October 2022, the total capacity available for de-loading in MERALCO's area is 568.59 MW from 119 companies representing 268 participating accounts.

MERALCO ILP DE-LOADING CAPACITY (MW) WITH SIGNED AGREEMENTS

 Since its implementation in 2014, MERALCO ILP has spared as many as 1.8 million households from rotating power interruptions.

NOTIFICATION:

MERALCO's Customer Care Group directly notifies ILP Participants through their contact persons of grid conditions and possible ILP activation

SEPTEMBER 12, 2022

Daily Power Supply Situation

As of 12:53 PM

The NGCP has placed the Luzon Grid* under the following conditions due to insufficient operating reserve:

RED ALERT 4:00 PM - 8:00 PM

8:01 PM - 11:00 PM

Interruptible Load Program (ILP) participants, please prepare for possible activation.

Notification

Activation

Determination of Compensable kWh

Billing

ILP Notification Process

1st Notification: 5pm of prior day

Yellow and **Red** System Alerts from NGCP

Only with NGCP advice

2nd Notification: 7am of current day

Yellow and Red System Alerts updates from NGCP

Red Alert status persists

Final Confirmation of de-loading: 2 hours before schedule

Actual de-loading on chosen schedule
Load back to normal after schedule

Immediately confirm to Customer Care:

- (1) receipt of notification/confirmation, and
- (2) ability to de-load as committed & as scheduled

Notification Reminders

Make sure to provide the correct landline number, mobile number and email address

Depending on the level of reserves, the **final confirmation notice** may also be the first and only notice for de-loading should a large power plant unexpectedly breaks down. This will be an emergency ILP activation.

Always confirm participation immediately to **MERALCO's Customer Care (1622-8118)**

- Remember that this will be the basis for compensation
- Feedback to other MERALCO personnel or Relationship Manager will not be considered as official advice

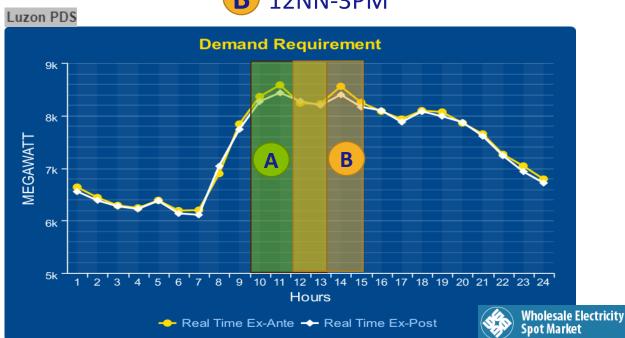

ACTIVATION: Participants choose between 2 de-loading windows that capture morning and afternoon peak:

A 10AM-1PM

B 12NN-3PM

Notification

Activation

Determination of Compensable kWh

Billing

Activation Reminders

Always ensure ample fuel supply

De-load **immediately** once instructed by MERALCO

Depending on the level of deficiency and time of Red Alert pronouncement by NGCP, participants may be requested to **extend deloading** or de-load outside preferred schedules

If you are unable to continue de-loading during the prescribed de-loading hours, please notify MERALCO's ILP hotline (1622-8118) immediately and indicate:

- (1) reason for inability to continue de-loading and
- (2) estimated time when the problem is expected to be resolved

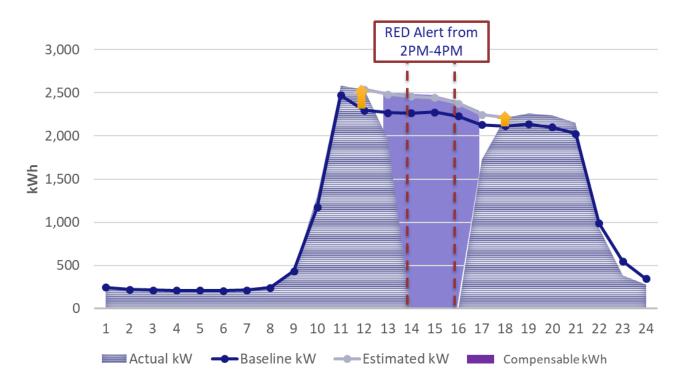

Switch back to normal operations after the prescribed de-loading schedule unless an extension has been issued by MERALCO's Customer Care

DETERMINATION OF COMPENSABLE KWH: MERALCO will read consumption meters of participating accounts at the same time as the usual reading for billing & tag hours of ILP activation

Determination of Compensable kWh

Billing

Billing and Compensation (Amendments) 🔚 💽 🥌

De-loading Compensation _{pesos}	=	[Incremental De-loading Rate x Compensable kWh]	+	Maintenance Cost
Where:				
Incremental De-loading Rate	=	[Generation Cost of Fuel x Fuel Consumption Rate]	-	PC Average rate
Generation Cost of Fuel	=	Average price of diesel fuel from Petron, Shell and Caltex for the previous month as of the end of the previous calendar month in the city or municipality where the Participating Customer is located		
Fuel Consumption Rate	=	0.28 0.34 liter/kWh		
PC Average Rate	=	Average Rate for the current billing period		
Compensable kWh	=	Actual de-loaded kWh for the current billing period		
Maintenance Cost	=	PhP0.32/kWh x Compensable kWh or PhP23,548.00/month, whichever is lower		

Average Rate refers to the average PhP/kWh paid by the Customer, including Generation, Transmission, Distribution and non-bypassable cost (Universal Charge, FiT-All, Lifeline, VAT, etc)

Art. IV Sec. 1 ERC Resolution No. 5 Series of 2015

5

SETTLEMENT: The signed conforme letter must be returned to MERALCO within 8 days from receipt.

Upon receipt of the signed conforme letter, MERALCO will process payment within 30 days.
