

**Jason B. Elamparo**

Team Leader, Technical Services – East

Jason is no stranger to energy; before joining Meralco, he was the Lead Technician at Sunpower Philippine Manufacturing Limited, American Company that manufactures Silicon wafers for Solar Cells and Solar Panels. He is also very familiar with the demands of precision engineering, having worked as an optical disk media Quality Control Engineer at Samsung Electronics Philippines Manufacturing Corp.

These days, he works tirelessly to provide his customers with timely technical assistance and efficient coordination on all their energy needs. These customers include the newly-built Maibarara Geothermal Power Plant in Batangas, AIR Liquide Pipeline Utilities in Laguna, and the prestigious International Ride Research Institute, where he helped facilitate the switch for the NGCP to the Meralco grid.

Jason is a licensed Electrical Engineer, and a graduate of the Mapua Institute of Technology.
