

### **Ray V. Rodriguez**

Team Leader, Technical Services - South

Wherever the wheels of industry keep the economy going, Ray Rodriguez and his technical services team are there to make sure those wheels are constantly turning. Assigned to cover industrial and commercial establishments in the CALABARZON areas, Ray specializes in working with Industrial Compound Developers and Administrators, as well as National Agencies like the Philippine Economic Zone Authority (PEZA) which issues certifications for Export Processing Zones in the country. In particular, Ray's team provides regular advice to PEZA and conducts cross technical consultation with PEZA engineers.

Among the many projects, Ray's team has serviced are the First Philippine Industrial Park in Sto. Tomas, Batangas, Nuvali, Laguna Technopark, the Light Industry & Science Park of the Philippines and the Carmelray Industrial Park 2 in Laguna. Ray's team also handled the Maibarara Geothermal generator application, the 75 MVA - 69 kV plant of J.G. Summit, the 7 MVA transformer application for AG&P's steel trusses manufacturing site both in Batangas City and helped upgrade the transformer capacities of Nestle-Cabuyao and Air Liquide at the Calamba Premiere International Park, Batino, in Laguna. The team also handles the high-rise condominium projects of SM Wind Residences & Alveo's Kasa Luntian at Tagaytay City and Paranaque's glitzy, pulsating Entertainment City which includes Solaire and City of Dreams.

Ray, a Registered Electrical Engineer, is the current Chairman of the Technical Information Committee for the Institute of Integrated Electrical Engineers (IIEE). He is member for 7 years of IEEE-Region 10 and was a former governor of Society of Philippine Electrical and Contractor and Suppliers (SPECS)

Ray received his bachelor's degree in Electrical Engineering from the University of Santo Tomas.
