

IF YOU DID NOT RECEIVE YOUR MAY BILL, HERE'S WHAT TO EXPECT ON YOUR JUNE BILL.

- · It is based on actual meter reading.
- Your June bill may be higher than your previous months' bills because it includes your total actual consumption based on the last two actual readings before and after the ECQ/MECQ periods.
- If you received estimated March and April bills, please set these aside and refer to your June bill.
- If you already paid for any of the estimated bills, you may request for a refund.
 Otherwise, credits will be reflected in your succeeding bills.
- You only need to pay one fourth (1/4) of your Current Charges by the due date of your June bill.
- The remaining balance or three fourths (3/4) may be settled in 4 or 6 monthly installments.

HINDI NAKATANGGAP NG MAY BILL? ITO ANG MAAASAHAN SA JUNE BILL.

- · Ito ay base sa actual meter reading.
- Mataas po ang June bill dahil ito ang naipon na konsumo simula noong huling actual reading hanggang ngayong June actual reading.
- Kung nakatanggap kayo ng estimated March at April bills at hindi nabayaran, pakitabi na lang po.
- Kung nabayaran na, ito ay ia-apply sa susunod na bills.
- 1/4 ng June bill (Current Charges) ay due no earlier than June 30.
- Ang 3/4 na balanse ay isasama sa monthly installments.

WHY IS MY JUNE BILL UNUSUALLY HIGH?

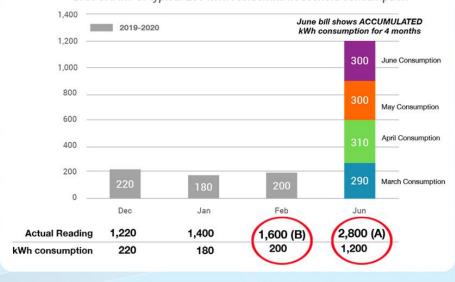

Now that we have been able to read your meter, your June bill includes your total consumption based on the last two actual readings before and after the ECQ / MECQ periods.

Let's use Lorna's household as an example, shown in the BAR CHART.

Here we see the last reading for Lorna's house was done in February, and the next reading was done in June.

SPECIAL EDITION

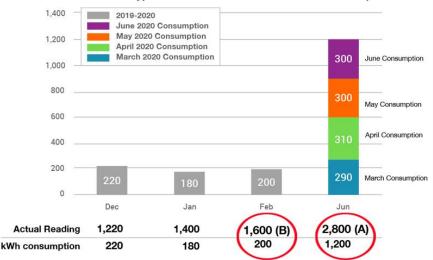

BAKIT ANG TAAS NG ATING JUNE BILL?

Nakapag-meter reading na po kami at kasama sa inyong June bill ang **naipon na actual consumption** mula sa huling actual meter reading hanggang ngayong June actual reading.

Bilang halimbawa, tingnan po natin ang konsumo sa bahay ni Lorna na pinapakita sa BAR CHART na ito.

BAR CHART of typical 200 kWh residential household consumption

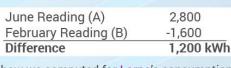

JUNE

2020

HOW DID WE COMPUTE FOR LORNA'S CONSUMPTION FROM MARCH TO JUNE?

Here's how we computed for Lorna's June bill. Let's look at the Present Reading (Pres Rdg) found at the back of her February and June bills. In Lorna's example, the last two actual readings are June reading (2,800) and February reading (1,600).

Here's how we computed for Lorna's consumption from March to June.

Formula: Bill (N) =
$$\left(\frac{\text{Total consumption}}{\text{Total bill days}}\right)$$
 X N bill days

March bill = $\left(\frac{1200}{29 + 31 + 30 + 30}\right)$ x 29 bill days = **290 kWh**

April bill = $\left(\frac{1200}{29 + 31 + 30 + 30}\right)$ x 31 bill days = **310 kWh**

May bill = $\left(\frac{1200}{29 + 31 + 30 + 30}\right)$ x 30 bill days = **300 kWh**

June bill = $\left(\frac{1200}{29 + 31 + 30 + 30}\right)$ x 30 bill days = **300 kWh**

*June consumption covers 4-month actual consumption. Published rates apply for each month.

JUNE

2020

PAANO NA-COMPUTE ANG KONSUMO NI LORNA MULA MARCH TO JUNE?

Ganito po namin na-compute ang konsumo ni Lorna mula March hanggang June.

Formula: Bill (N) =
$$\left(\frac{\text{Total consumption}}{\text{Total bill days}}\right)$$
 X N bill days

March bill = $\left(\frac{1200}{29 + 31 + 30 + 30}\right)$ x 29 bill days = **290 kWh**

April bill = $\left(\frac{1200}{29 + 31 + 30 + 30}\right)$ x 31 bill days = **310 kWh**

May bill = $\left(\frac{1200}{29 + 31 + 30 + 30}\right)$ x 30 bill days = **300 kWh**

June bill = $\left(\frac{1200}{29 + 31 + 30 + 30}\right)$ x 30 bill days = **300 kWh**

*June consumption covers 4-month actual consumption. Published rates apply for each month.

HOW MUCH SHOULD I PAY IN JUNE?

To help ease your bills payment, you only need to pay one fourth (1/4) of your Current Charges. You may find the details regarding this on page 3 of your bill.

To ease your bills payment, there is no need to pay the remaining balance (A) in full:

% of Remaining Balance (A): P3,750.00 Due Date: 30 June 2020 ATM/Phone Reference Number:0-123456789-3-0618 Meralco Reference Number: 0-123456789-3-200618-0-200706-0-6

% of the Remaining Balance is payable in 4/6 monthly installments starting July 15, 2020. Please refer to the table below, for your installment payment schedule. Please expect another letter to explain the details of your installment plan.

Households with consumption of 200 kWh and below (as of Feb 2020)	Households with consumption of 201 kWh and above (as of Feb 2020)	
1st installment: July 15	1st installment: July 15	
2nd installment: Aug 15	2nd installment: Aug 15	
3rd installment: Sept 15	3rd installment: Sept 15	
4th installment: Oct 15	4th installment: Oct 15	
5th installment: Nov 15		
6th installment: Dec 15		

ever, you may also opt to pay your June bill in full to prevent bills from piling up.

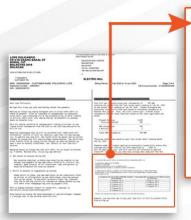

SPECIAL EDITION

MAGKANO ANG BABAYARAN KO NGAYONG JUNE?

1/4 ng inyong Current Charges ang kailangang bayaran. Nakadetalye po ito sa page 3 ng inyong bill.

To ease your bills payment, there is no need to pay the remaining balance (A) in full:

% of Remaining Balance (A): P3,750.00 Due Date: 30 June 2020 ATM/Phone Reference Number:0-123456789-3-0518 Meralco Reference Number: 0-123456789-3-200518-0-200706-0-6

Households with consumption of 200 kWh and below (as of Feb 2020)	Households with consumption of 201 kWh and above (as of Feb 2020)	
1st installment: July 15	1 st installment: July 15 2 nd installment: Aug 15 3 ^{sd} installment: Sep 15	
2 nd installment: Aug 15		
3 rd installment: Sep 15		
4th installment: Oct 15 4th installment: Oct 15		
5 th installment: Nov 15		
6th installment: Dec 15		

WHAT IS THE INSTALLMENT PLAN FOR THE 3/4 OF THE REMAINING BALANCE OF MY JUNE BILL?

6-MONTH INSTALLMENT Households with consumption of 200 kWh and below in Feb 2020	4-MONTH INSTALLMENT Households with consumption of 201 kWh and above in Feb 2020	
1 st installment: July 15	1 st installment: July 15	
2 nd installment: Aug 15	2 nd installment: Aug 15	
3 rd installment: Sep 15	3 rd installment: Sep 15	
4 th installment: Oct 15	4 th installment: Oct 15	
5 th installment: Nov 15		
6 th installment: Dec 15		

This is a similar installment plan for customers who received their May bills, in accordance with the ERC Advisory on May 22.

ANO ANG INSTALLMENT PLAN SA 34 NA BALANSE NG JUNE BILL?

6-MONTH INSTALLMENT Kung 200 kWh at pababa ang inyong Feb 2020 consumption	4-MONTH INSTALLMENT Kung 201 kWh at pataas ang inyong Feb 2020 consumption	
1 st installment: July 15	1 st installment: July 15	
2 nd installment: Aug 15	2 nd installment: Aug 15	
3 rd installment: Sep 15	3 rd installment: Sep 15	
4 th installment: Oct 15	4 th installment: Oct 15	
5 th installment: Nov 15		
6 th installment: Dec 15		

Ito ay katulad ng installment plan sa mga nakatanggap ng May bill at ayon sa ERC advisory dated May 22.

WHY IS MY JUNE BILL UNUSUALLY HIGH?

Your June bill reflects the sum of your actual consumption that includes months when we were not able to read your meter.

Here are other factors that may have affected your bill:

Higher electricity usage during ECQ
With the enforcement of Enhanced Community Quarantine,
more people spent more time at home. Appliances (TV,
electric fan, computer, game console, air conditioner, etc.) were
used longer. Refrigerator doors may have been opened more
frequently.

• Higher consumption due to hot weather
Warmer temperatures during summer means appliances with
compressors, like aircons and refrigerators, tend to work harder,
thus consuming more power, compared to when used during
cooler months. Meralco Power Lab estimates a 25% to 40%
increase in these appliances' electricity consumption in summer,

even without additional usage time. Accordingly, if they are used longer and more frequently, consumption increases even more.

BAKIT PO TUMAAS ANG AKING JUNE BILL?

Dahil ito ay konsumong naipon sa mga hindi nabasahang buwan. Maliban dito, ito pa ang mga dahilan:

 Mas mataas na konsumo during ECQ.
 Mas maraming naglalagi sa bahay kaya maaaring mas madalas at mas matagal ang paggamit ng mga appliances tulad ng TV, electric fan, computer, game console, at air conditioner.
 Ang refrigerator ay maaaring binubuksan din nang mas madalas.

Mainit na panahon na nagpapataas ng konsumo.
 Kapag mainit sa labas, ang mga appliances na may compressors tulad ng aircons at refrigerators ay mas nahihirapan, kaya ang konsumo nito ay mas mataas. Sa pag-aaral ng Meralco Power Lab, tumataas nang 25% to 40% ang electricity consumption habang panahon ng tag-init kahit hindi nadagdagan ang oras ng paggamit nito.

IF I ALREADY PAID FOR MY BILLS DURING ECQ, WILL THIS BE SHOWN IN MY JUNE BILL?

Yes.

1. Please refer to **page 2** of your June bill and look for the **Applied Credits** section to see the amount that has been credited to your June bill.

**Customers can refund the excess credits or these can be applied to previous unpaid balance and/or future billings.

I ALREADY PAID FOR MY MARCH, APRIL, AND MAY BILLS. WHY IS MY JUNE BILL STILL UNUSUALLY HIGH?

- Set aside any bills based on estimated meter readings that you may have received. Since we were already able to read your meter in June, your June bill reflects the sum total of your actual consumption from March, April and May. Any payments you have made have been deducted from the total amount due.
- Your previous payments were for bills based on estimated readings which may have been understated. With the enforcement of the ECQ, more people spent more time at home and appliances may have been used longer.

NAGBAYAD NA AKO NG MARCH, APRIL, AT MAY BILLS. Bakit mataas pa rin ang June Bill ko?

- Actual consumption na po ang naka-print sa inyong June bill dahil nakapag reading na po kami. Ang konsumong hindi pa naisama sa binayaran n'yong estimated March, April, at May bills ay kasama na rin dito.
- Kung matatandaan, mas maraming naglalagi sa bahay noong ECQ kaya maaaring mas madalas at mas matagal ang paggamit ng appliances sa bahay.
- Kung nagbayad ka ng estimated March, April, at May bills, ibinawas na ang mga 'to sa June bill. Makikita ito sa Applied Credits section ng inyong June bill (page 2).
